

## POLYTECHNIC OF MEÐIMURJE IN ČAKOVEC

MAN							
COURSE SYLLABUS							
	ACADEMIC YEAR:	2020/2021					
1. GENERAL COURSE INFO	RMATION						
1.1 Course name	CONSTRUCTION MODEL	LING – OG,EI					
1.2 Study program/s	Undergraduate profession	Undergraduate professional study Sustainable Development					
1.3 Course status (O,E)	Required	1.6 Mode of	Lectures	15			
1.4 Course code	4011	instruction	Exercises	30			
1.5 Course abbreviation	KM-OG	(number of	Seminars				
1.6 Semester	II semester	hours)	E-learning				
1.7 ECTS	4	1.7 Place and	,				
		time of	Međimurje i				
		instruction	-	the schedule			
			published on	the website			
2. TEACHING STAFF							
2.1 Course leader/s-title	Jasmina Ovčar,	contact	jovcar@mev	.hr			
	mag.ing.arh.i urb. senior lecturer						
		contract					
2.2 Assistant/s- title		contact contact					
2.2 Assistant/s- title		contact					
2.3 Instruction held by-		contact					
title		contact					
3. COURSE DESCRIPTION	1						
3.1 Course goals	The aim of the course is '	to train students to us	se new tools u	sing computers in			
	The aim of the course is to train students to use new tools using computers in the construction process. Students must master the way they work in BIM						
	construction programs, as this is imperative for competitiveness in the labour						
	market. This course is an introduction to the BIM system through the AllPlan						
	program, whereby students master basic drawing skills so that they can build						
	on the acquired knowledge in all courses that follow in the study direction						
	Sustainable construction, expanding them into the areas of architectural						
	design, constructor design and dimensioning, technology and organization of						
	construction, urban design, energy certification of buildings, building						
	management, etc., including in all segments the issue of sustainability.						
3.2 Prerequisites	The condition for joining this course is passed the Technical Drawing Exam						
	(OG,EI). The requirement for taking the exam in Construction Modelling is a						
3.3 Course outcomes	completed course and all the work tasks from the given course are fulfilled.						
5.5 Course outcomes	Studenti će nakon uspješno savladanog kolegija moći: I1 – kreirati tehnički crtež u BIM sustavu (AllPlan) u skladu s pravilima tehničke						
	struke, uključujući okvir, sastavnicu, tehničko pismo, formatiziranje / R 3						
	12 – analizirati različita mjerila te predložiti i odabrati prihvatljivo mjerilo za						
	crtanje, odabir vrsta crta, radeži u BIM sustavu/ R 4						
	13 - analizirati kotiranje kako bi nacrtani element bio jednoznačno određen, te						
	kreiranje načina kotiranja na zadanom crtežu / R 5						
	14 – razumjeti i analitički obraditi podatke iz idejne skice ili rješenja na temelju						
	koje se izrađuje tehnički crtež u BIM sustavu / R 5						
	15 – modelirati objekt u s	rati objekt u skladu sa zadanim zadatkom/R 6					

	I6 – analizirati uzročno-posljedične veze pri izradi crteža i modela te pronalaziti kraće i brže načine izrade na temelju vlastitih stečenih vještina i znanja /R6											
3.4 Course content	The BIM system, which is now increasingly used, would have to become a standart soon, and with new generations of students decided to work in this system, with a continuous professional education of teaching staff.

	Points	-		t (5)								

	71 – 80 good (3)			
	61 - 70 pass (2)			
	0 - 60 fail (1)			
3.10 Specific features	Regular attendance and teaching activities are important, as lectures and			
related with taking	exercises aim to master the material. Therefore, it is necessary to work			
the course	regularly and at home, through solving the given tasks, and resolving all doubts			
	and misunderstandings immediately on the next hour. Every well-crafted task			
	in class and at home is defined as a colloquiated material. The final written			
	exam is taken at the time of regular and extraordinary exam periods. The			
	written exam consists of creating a model according to the default template.			
	The type of question is defined by the teacher, but all questions and tasks cover			
	the material of the course that was handled in lectures and exercises.			
3.11 Students obligations	Full-time students are required to attend at least 70% of the total number of			
	hours of lectures and exercises in order to exercise the right to take the exam.			
	Part-time students are required to attend at least 30% of the total number of			
	hours of lectures and exercises in order to exercise the right to take the exam.			
	If the student has not fulfilled all the obligations provided for in the course,			
	he/she is obliged to attend lectures again and meet the requirements for			
	taking the exam. Incomingness can be compensated by online consultations, organized			
	webinars and added tasks set by teachers. One class lasts 45 minutes, and			
	more hours make up the unit. Absence from one unit counts as one absence.			
	Delays and notes are recorded separately. In this case, the student has been			
	absent with more than 50% of the lessons, and has a legitimate			
	reason/apology, the application should be submitted to the Department			
	Council, which then decides on the justification of student absences with the			
	obligatory opinion of the holder of the course.			
3.12 Written	Preparation of all written tasks (with exercises and domestic papers) is a			
assignments	condition for obtaining signatures from this course, and a prerequisite for			
	taking the exam. The result of advancement in the course is reflected in the model made at the beginning of class. Depending on the degree of progress			
	and accuracy of the processed model, the initial assessment for the written			
	exam is encouraged.			
	The workload includes a continuous oral knowledge check carried out as part			
	The workload includes a continuous oral knowledge check carried out as part of each exercise, in such a way that students have to clarify how they solved

4.2 Contact the teacher	Students can contact the teacher during the office hours and during classes,
	while for short questions and explanations they can contact him/her any day
	during working hours by coming in person or by landline. It is also possible to
	ask questions by e-mail, which will be answered in 48 hours at the latest. It is
	desirable for students to come as often as possible for any possible questions
	during the teacher's office hours.
4.3 Information about	It is the obligation of each student to be regularly informed about the course.
the course	All notifications about the classes or possible postponement of classes will be
	posted on the bulletin board and on the website of the Polytechnic at least 24
	hours in advance.
4.4 Course contribution	I1 - Interpret information, ideas, problems and solutions to professional and
to the study	general audiences
program	I2 - Use new technologies and techniques as part of the lifelong learning
program	
	process
	13 - Use foreign languages in professional communication and use of
	professional literature
	14 - Represent an ethical approach in work and according to project team
	associates
	I5 - Critically judge arguments, assumptions and data in order to create
	opinions and adhesion
	troubleshooting
	C C
	117 - Create an architectural and urban solution using basic principles of
	designing low-energy buildings using modern computer systems
