

# POLYTECHNIC OF MEĐIMURJE IN ČAKOVEC

## COURSE SYLLABUS

ACADEMIC YEAR: 2021/2022

| 1. GENERAL COURSE INFORMATION  |  |   |   |    |
|--------------------------------|--|---|---|----|
| 1.1 Course name                | Basics of Automation   |   |   |    |
| 1.2 Study program/s            | Undergraduate professional study Sustainable Development   |   |   |    |
| 1.3 Course status (O,E)        | Obligation   | 1.6 Mode of instruction (number of hours) | Lectures  | 15 |
| 1.4 Course code                |  |   | Exercises   | 30 |
| 1.5 Course abbreviation        | OA   |   | Seminars  |    |
| 1.6 Semester                   | IV   |   | E-learning  |    |
| 1.7 ECTS                       | 4  | 1.7 Place and time of instruction         | Premises of the Polytechnic of Međimurje in Čakovec, according to the schedule published on the website |    |
| 2. TEACHING STAFF              |  |   |   |    |
| 2.1 Course leader/s-title      | prof. Sarajko Baksa, Ph.D.   | contact                                   | sbaksa@mev.hr   |    |
|                                | ---  | contact                                   | ---   |    |
| 2.2 Assistant/s- title         | ---  | contact                                   | ---   |    |
|                                | ---  | contact                                   | ---   |    |
| 2.3 Instruction held by- title | ---  | contact                                   | ---   |    |
| 3. COURSE DESCRIPTION          |  |   |   |    |
| 3.1 Course goals               | The aim of the course is to acquire basic knowledge in the field of automation. Explain and use knowledge about the maintenance of automated devices within the production process. Describe and identify the type of automation. Detect, calculate and connect the necessary equipment according to the attached schemes. Design and prepare the basics of application of individual executive components of automated processes.   |   |   |    |
| 3.2 Prerequisites              | Passed exams in Technical Drawing, Structural Modeling, Mathematics I, II, and / or Management Software  |   |   |    |
| 3.3 Course outcomes            | <p>After successfully passing the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain the basic postulates in the field of automation.</li> <li>2. Interpret the basic postulates in the field of automation.</li> <li>3. Identify and distinguish the type of automation.</li> <li>4. Design the maintenance of automated devices within the production process.</li> <li>5. Manage the maintenance of automated devices within the production process.</li> <li>6. Design schematic drawings of automated processes.</li> <li>7. Calculate schematic drawings of automated processes.</li> <li>8. Apply and evaluate schematic drawings of automated processes.</li> <li>9. Detect and connect the necessary equipment according to the schematic drawings.</li> <li>10. Develop and build leadership, regulation and automation process management.</li> </ol> |   |   |    |
| 3.4 Course content             | The course presents contents related to the concept, possibilities and role of automation and automated machines and devices within the production process.  |   |   |    |

| <b>3.5 Types of coursework</b>   | x   | Lectures               | x         | Exercises         | x               | Blended e-learning | x          | Individual activities      |   | Laboratory |                                      |           |        |                               |  |  |            |    |   |                |          |         |                          |                 |              |                        |           |    |                         |     |    |           |     |    |   |  |  |              |     |    |               |             |            |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |            |  |  |   |  |   |   |   |                     |   |   |  |  |  |  |    |              |          |          |           |           |           |           |            |

| Outcome not-related  | 5   | 5                      |           |                   |                 |                    | 10         |                            |   |            |                                      |           |        |                               |  |  |            |    |   |                |          |         |                          |                 |              |                        |           |    |                         |     |    |           |     |    |   |  |  |              |     |    |               |             |            |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |            |  |  |   |  |   |   |   |                     |   |   |  |  |  |  |    |              |          |          |           |           |           |           |            |
| <b>Total</b>   | <b>5</b>  | <b>5</b>               | <b>20</b> | <b>20</b>         | <b>20</b>       | <b>30</b>          | <b>100</b> |                            |   |            |                                      |           |        |                               |  |  |            |    |   |                |          |         |                          |                 |              |                        |           |    |                         |     |    |           |     |    |   |  |  |              |     |    |               |             |            |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |   |  |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |           |  |  |   |  |   |   |   |            |  |  |   |  |   |   |   |                     |   |   |  |  |  |  |    |              |          |          |           |           |           |           |            |

|  |   |  |
|--|---|--|
|  | <p>The grade is calculated as follows:</p> <ul style="list-style-type: none"> <li>• 87.51-100.00 points: rating Excellent (5)</li> <li>• 75.01- 87.5 points: rating Very good (4)</li> <li>• 62.51 -75.00 points: rating Good (3)</li> <li>• 50.01- 62.5 points: rating Pass (2)</li> <li>• 00.00- 50.00 points: rating Fail (1)</li> </ul>   |  |
| <b>3.10 Specific features related with taking the course</b> | <p>If the student collects 50% of the points of each outcome, he / she directly takes the exam, provided that he / she has done practical work (seminars / project). During the exam, it is possible to orally check the knowledge from practical work (seminars / project).</p> <p>Once earned points for each learning outcome are no longer deleted unless the student, with the express approval of the course leader, decides to correct the result for each learning outcome, whereby the points won are deleted and newly earned points for that learning outcome are entered. The final grade is obtained on the exam period and is the sum of points earned during classes.</p> <p>Students who did not take the colloquium access the written part of the exam where all learning outcomes are checked, and are required to have completed practical work (seminars / project) before taking the exam.</p>  |  |
| <b>3.11 Students obligations</b>                             | <p>Full-time students are required to attend at least 70% of the total number of hours of lectures and exercises in order to exercise the right to take the exam.</p> <p>Part-time students are required to attend at least 30% of the total number of hours of lectures and exercises in order to exercise the right to take the exam.</p> <p>If the student has not fulfilled all the obligations set by the course, he is obliged to attend the lectures again and meet the conditions for taking the exam.</p> <p>Attendance can be offset by online tuition, organised webinars and added assignments given by teachers. One lesson lasts 45 minutes, and several hours form a teaching unit. Absence from one teaching unit is counted as one absence. Delays and apologies are recorded separately. In that case, if the student missed more than 50% of classes, and has a justifiable reason/apology, the request should be submitted to the Department Council, which then decides on the justification of student absences with the obligatory opinion of the course leader.</p> |  |
| <b>3.12 Written assignments</b>                              | Seminars / Projects   |  |
| <b>3.13 Required reading</b>                                 | 1.  | Z. Vukić, Lj. Kuljača: Automatsko upravljanje – analiza linearnih sustava, Kigen, Zagreb, 2004.                |
|  | 2.  | Z. Vukić, Lj. Kuljača, D. Đonlagić, S. Tešnjak: Nonlinear Control Systems, Marcel Dekker, Inc., New York, 2003 |
|  |   |  |
| <b>3.14 Additional reading</b>                               | 1.  | R. N. Clark: Control System Dynamics, Cambridge University Press, 1996.  |

#### 4 ADDITIONAL COURSE INFORMATION

|   |  |
|---|--|
| <b>4.1 Quality control</b>                          | <p>The quality of the program, teaching process, teaching skills and level of mastery of the material will be established by conducting a written evaluation based on questionnaires, and in other standardised ways and in accordance with the by-laws of the Polytechnic of Međimurje in Čakovec.</p>  |
| <b>4.2 Contact the teacher</b>                      | <p>Students can contact the teacher during the office hours and during classes, while for short questions and explanations they can contact him/her any day during working hours by coming in person or by landline. It is possible to ask questions and e-mail which will be answered as soon as possible.</p>  |
| <b>4.3 Information about the course</b>             | <p>It is the obligation of each student to be regularly informed about the course. All relevant information and notices related to classes and exams, maintenance or any year, will be reported in a timely manner on the bulletin board and on the website of the Polytechnic of Međimurje in Čakovec.</p>  |
| <b>4.4 Course contribution to the study program</b> | <p>Course contribution to the study program in generic learning outcomes;</p> <ul style="list-style-type: none"><li>I1 - Interpret information, ideas, problems and solutions to professional and General public,</li><li>I2 - Use new technologies and techniques as part of a lifelong process Learning,</li><li>I5 - Critically evaluate arguments, assumptions and data in order to create opinions and contributing to the solution of the problem.</li></ul> <p>The contribution of the course to the study program in specific learning outcomes;</p> <ul style="list-style-type: none"><li>I6 - Solve engineering problems of sustainable development by applying mathematics, physics, chemistry and biology,</li><li>I7 - Analyze collected data in the field of sustainable development,</li><li>I8 - Interdisciplinary to solve engineering problems of sustainable development,</li><li>I11 - Apply basics of thermoenergetics, thermodynamics and hydromechanics in spatial design of thermodynamic systems,</li><li>I12 - Develop a technical plan in the field of design of Mechanical Thermotechnical System,</li><li>I13 - Analyze the basic elements and networks in electrical engineering and justify use of non-renewable and renewable energy sources, applicable code thermotechnical systems,</li><li>I14 - Apply and monitor conventional heating, cooling, and ventilation systems and devices,</li><li>I15 - Maintain thermotechnical systems and thermal distribution networks</li><li>I16 - Propose technical changes and upgrades to conventional ones thermotechnical systems in the direction of sustainable development.</li></ul> |

**5. ANALYSIS OF COURSE TOPICS (the number of hours is equal to the number of lectures and exercises of the course)**

| <b>LECTURES</b> |  |  |  |                       |
|-----------------|--|--|--|-----------------------|
| <b>Hours</b>    | <b>Topic and description</b>   | <b>Method</b>  | <b>Learning outcomes</b>   | <b>Course outcome</b> |
|                 |  | <ul style="list-style-type: none"> <li>• Direct teaching (lecture, instruction, pp presentation)</li> <li>• Discovery learning (individual, lead, discussion)</li> <li>• Group learning</li> <li>• Case study</li> <li>• Field classes...</li> </ul> |  |                       |
| 1.              | Introduce students to the lecture program, teaching conditions, literature and criteria for evaluating knowledge. Development and perspective of automation, a historical overview of development with an impact on the development of society | Lecture, Discovery learning, Presentation  | Use knowledge of historical development and future perspective projections of automation | 11                    |
| 2.              | System types and system features, Example of a technical system, Relationship between system and environment. Example of a mixed system, input and output sizes.   | Lecture, Discovery learning, Presentation  | Distinguish system models and system features, input and output sizes.                   | 12                    |
| 3.              | Production part, guide part, connection of production part with guide part. Principles of process management.  | Lecture, Discovery learning, Presentation  | Distinguish the principles of managing production processes                              | 13                    |
| 4.              | Feedback principle. Room temperature control on the example of feedback.   | Lecture, Discovery learning, Presentation  | Use feedback principles  | 13                    |
| 5.              | The principle of advanced connection. Room temperature control on the example of an advanced connection.   | Lecture, Discovery learning, Presentation  | Use the principles of advanced connection  | 13                    |
| 6.              | Basic concepts of process monitoring and measurement, Example of process measurement. Measuring transducer and measuring signal, Types of measuring signal.  | Lecture, Discovery learning, Presentation  | Distinguish measurement processes, transducers and types of measurement signals          | 14                    |
| 7.              | Input and output characteristics of measuring transducers. Examples of input features. Measurement errors, Examples of measurement errors.   | Lecture, Discovery learning, Presentation  | Apply and distinguish input and output features  | 15                    |
| 8.              | Transmission features: Example of static characteristic, Example of dynamic characteristic. Example of active and passive measuring transducer.  | Lecture, Discovery learning, Presentation  | Apply static and dynamic transmission features   | 15                    |
| 9.              | Offset transducers, Example of offset transducers. Motion transducers, Example of motion transducers.  | Lecture, Discovery learning, Presentation  | Use the knowledge of the positional technical displacement transducer                    | 16                    |

|                            |  |   |  |                       |
|----------------------------|--|---|--|-----------------------|
| 10.                        | Pneumatic actuators, Pneumatic single acting cylinders, Examples. Pneumatic double-acting cylinders, Examples.   | Lecture, Discovery learning, Presentation   | Apply the basic concept of pneumatic   | 17                    |
| 11.                        | Pneumatic symbols, Examples.   | Lecture, Discovery learning, Presentation   | Apply graphics of pneumatic symbols  | 18                    |
| 12.                        | Pneumatic motors, Examples. Pneumatic distributors, Examples.  | Lecture, Discovery learning, Presentation   | Explain the positions of the assembly and the switching technical pneumatic system       | 19                    |
| 13.                        | Pneumatic guidance, regulation and control.  | Lecture, Discovery learning, Presentation   | Explain Pneumatic guidance, regulation and control                                       | 110                   |
| 14.                        | Electrical guidance, regulation and control  | Lecture, Discovery learning, Presentation   | Explain Electrical guidance, regulation and control                                      | 110                   |
| 15.                        | Computer control, regulation and management  | Lecture, Discovery learning, Presentation   | Apply Computer control, regulation and management  | 110                   |
| <b>EXERCISES/ SEMINARS</b> |  |   |  |                       |
| <b>Hours</b>               | <b>Topic and description</b>   | <b>Method</b><br><ul style="list-style-type: none"> <li>• Direct teaching (lecture, instruction, pp presentation)</li> <li>• Discovery learning (individual, lead, discussion)</li> <li>• Group learning</li> <li>• Case study</li> <li>• Field classes...</li> </ul> | <b>Learning outcomes</b>   | <b>Course outcome</b> |
| 1.                         | Introduce students to the lecture program, teaching conditions, literature and criteria for evaluating knowledge. Development and perspective of automation, a historical overview of development with an impact on the development of society | Lecture, Discovery learning, Presentation   | Use knowledge of historical development and future perspective projections of automation | 11                    |
| 2.                         | System types and system features, Example of a technical system, Relationship between system and environment. Example of a mixed system, input and output sizes.   | Lecture, Discovery learning, Presentation   | Distinguish system models and system features, input and output sizes.                   | 12                    |
| 3.                         | Production part, guide part, connection of production part with guide part. Principles of process management.  | Lecture, Discovery learning, Presentation   | Distinguish the principles of managing production processes                              | 13                    |
| 4.                         | Feedback principle. Room temperature control on the example of feedback.   | Lecture, Discovery learning, Presentation   | Use feedback principles  | 13                    |
| 5.                         | The principle of advanced connection. Room temperature control on the example of an advanced connection.   | Lecture, Discovery learning, Presentation   | Use the principles of advanced connection  | 13                    |

|     |   |   |  |     |
|-----|---|---|--|-----|
| 6.  | Basic concepts of process monitoring and measurement, Example of process measurement. Measuring transducer and measuring signal, Types of measuring signal. | Lecture, Discovery learning, Presentation | Distinguish measurement processes, transducers and types of measurement signals    | 14  |
| 7.  | Input and output characteristics of measuring transducers. Examples of input features. Measurement errors, Examples of measurement errors.                  | Lecture, Discovery learning, Presentation | Apply and distinguish input and output features                                    | 15  |
| 8.  | Transmission features: Example of static characteristic, Example of dynamic characteristic. Example of active and passive measuring transducer.             | Lecture, Discovery learning, Presentation | Apply static and dynamic transmission features                                     | 15  |
| 9.  | Offset transducers, Example of offset transducers. Motion transducers, Example of motion transducers.   | Lecture, Discovery learning, Presentation | Use the knowledge of the positional technical displacement transducer              | 16  |
| 10. | Pneumatic actuators, Pneumatic single acting cylinders, Examples. Pneumatic double-acting cylinders, Examples.  | Lecture, Discovery learning, Presentation | Apply the basic concept of pneumatic   | 17  |
| 11. | Pneumatic symbols, Examples.  | Lecture, Discovery learning, Presentation | Apply graphics of pneumatic symbols  | 18  |
| 12. | Pneumatic motors, Examples. Pneumatic distributors, Examples.   | Lecture, Discovery learning, Presentation | Explain the positions of the assembly and the switching technical pneumatic system | 19  |
| 13. | Pneumatic guidance, regulation and control.   | Lecture, Discovery learning, Presentation | Explain Pneumatic guidance, regulation and control                                 | 110 |
| 14. | Electrical guidance, regulation and control   | Lecture, Discovery learning, Presentation | Explain Electrical guidance, regulation and control                                | 110 |
| 15. | Computer control, regulation and management   | Lecture, Discovery learning, Presentation | Apply Computer control, regulation and management                                  | 110 |
